Tripod DA 100 K

Sachtler DA 100 K aluminium Tripod for 100 mm Fluid Heads

SKU: 5122

Having versatility in the field means being able to ensure the same quality, no matter what height you are shooting at. The Sachtler DA 100 K is a one-stage aluminum ENG mini-tripod that offers a height range of 13-27 cm, making it ideal for extremely low shooting positions. It features a 100 mm bowl, tube diameter of 16 mm and is equipped with the Sachtler rotary clamping system, which ensures speed and safety in every scenario.

A load capacity of 40 kg makes it strong enough to handle the majority of today's most widely used professional cameras. The Sachtler DA 100 K is a great addition to tripods of standard sizes, opening a range of new possibilities for those looking for the perfect shot. For enhanced stability, Sachtler also offers its very own mini-spider.
