The Optic Swap System

What's So Special about this System? A lot. It's the first Nikon Mount lens system with built-in filters. It's the first to Mount Nikon's largest 18-200mm zoom. It's the first to Mount Nikon's longest 70-300mm telephoto zoom.

Look at the optics. You'll understand the benefits of the system. The 18-200mm zoom is the widest of its class. The 55-200mm zoom is the longest of its class. The 70-300mm telephoto zoom is the longest of its class.

The design is perfect for the future. The 18-200mm zoom is the widest of its class. The 55-200mm zoom is the longest of its class. The 70-300mm telephoto zoom is the longest of its class.
