INTRODUCTION

PROAIM DSLR Kit 6-CF is full production ready filmmaking equipment for prosumer operators to increase the quality and efficiency during production. This shoulder mount camera rig is a dynamic piece of equipment that moves with the operator in a wedding shoot, corporate communications, and POP production to produce 'stills' and videos alike. It consists of versatile camera cage, durable matte box and precise follow focus that are highly configurable and adaptable to the daily demands of production. It embraces the flexibility to accessorize and match production requirements for professional results.

ASSEMBLING YOUR MB-600 MATTE BOX

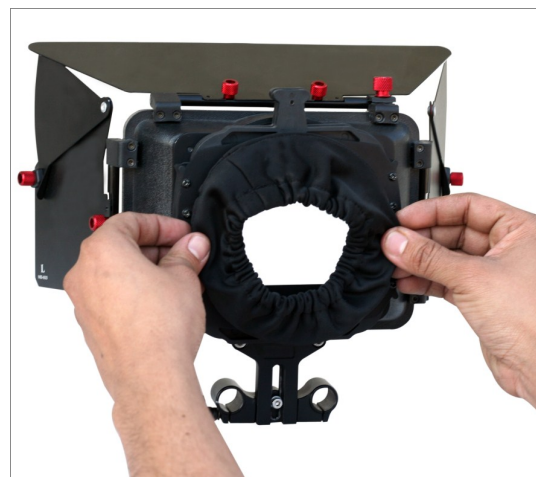

- Insert the French flag (top) to your matte box as shown below and then tighten the knob.

- Insert the Side flag to your matte box as shown below and then tighten the knob as shown below.

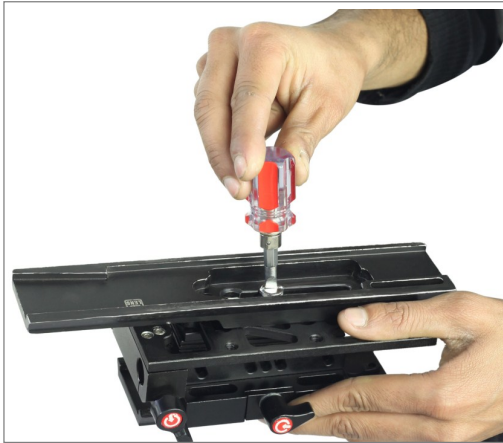

- Wrap the knicker on conversion ring, as shown in the image

Assembling Your DSLR Filmmaking Kit 6-CF

- Attach rod support system to your tripod plate and tighten with screw driver. Then mount the setup onto your tripod and secure with provided knob.

- Loosening the knob and simple push of provided button on quick release adapter allows you to remove quick release plate. Now attach it to camera base and tighten to secure.

- Slide in the camera setup onto quick release adapter, retighten the knob to ensure slip free connection.

- Now insert 2x 300mm female rods into quick release adapter. Now attach 2x 150mm extension rods to rails and tighten the knobs.

- Loosen the knob on cage bracket in order to insert it to 450mm rails. Using same approach insert another bracket to front of rails and tighten to secure.

- Loosen the knobs on top of cage brackets in order to insert 2x200mm rods into them, retighten to secure.

- Attach top handle to 200mm rods at cage top, retighten the knob to ensure slip free connection.

- Attach straight bracket to back of rail system and tighten the knob. Then insert 2x200mm rods into it and secure with provided knob.

- Now insert shoulder pad to 200mm rails, also attach counter weight and secure with provided knob.

- Attach flexible gear ring to your camera lens and tighten the screw.

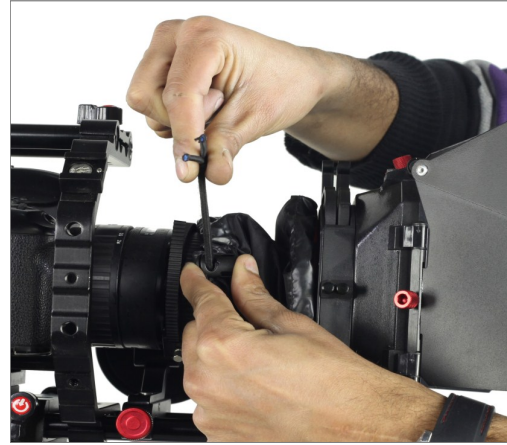

- Now insert X9 follow focus to front of rail system, adjust follow focus with your camera and secure.

- You can also attach speed crank to follow focus as per your requirement.

- Now insert MB-600 matte box to front rails, align with lens and secure with the knob as shown below.

- Attach handle setup to front of rods and tighten the knobs to secure it.

NOTE: You can tilt handle set as per your requirement by loosen the knob.
