SHENZHEN PORTKEYS ELECTRONIC TECHNOLOGY CO.,LTD

Product Appearance Size

Standard Accessories

OEYE-3G EVF X1	Safety Box X1
Tube Clip X1	Glasses Cloth X1
Warm Prompt Card X1	Aviation to B Mount
Universal DC Adaptor to Aviation X1	D-tap Cable X1
	U Disk (Manual, 3D LUTs, Firmware Inside) X1

Parameter

Size	0.71"
Dimension	180x69.7x72.4mm
Brightness(nit)	200
Resolution	1920x1080
Weight	400g
Color	8bit
Backlight	OLED
Material	Aluminium alloy
Input Voltage	DC 7~24V
Power Consumption	6.5W
Diopter	+8D~-3D
Signal Input	3G/HD/SD-SDI、4K HDMI、HDMI、USB
Signal Output	3G/HD/SD-SDI、HDMI
Menu Language	简体中文/English

Operating temperature range: 0 °C ~ 40 °C

Supported input/output resolution and frame rate

HDMI Signal

4096×2160p@24Hz
 3840×2160p@23.97Hz,24Hz,25Hz,29.97Hz,30Hz

Exit		◀ ▶

This manual is prepared based on the software version installed at the factory. With the continuous upgrade of the software, the software operation after the upgrade may be different from the book, and it will be changed without further notice, please have your understanding.

Universal Software Upgrade Tutorial

Attention:

1. Firmware upgrade divides into main firmware upgrade and MCU upgrade; If upgrade the main software, just put the main software upgrade file into the root directory of the U disk; If the main software and the MCU need to be upgraded, then both the upgrade files should be put in the root directory of the U disk.
2. Do not power off during the upgrade process.
3. U Disk supports FAT, FAT32, ExFat and NIFS formats.

⚠ Update method takes OEYE as an example, for other models, please download the corresponding model upgrade package in our official website and follow the steps below.

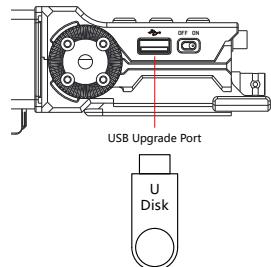

Main firmware upgrade:

1

Unzip the upgrade files of the main firmware, and then send the upgrade file (OEYE.bin) to the root directory of the U disk.

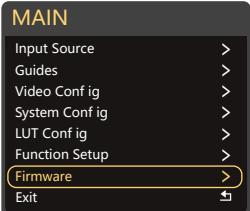

2

Supply power to the monitor, insert the U disk with upgrade file into the USB interface of the body.

3

Boot up the monitor, click MENU to open main menu, select "Firmware" and click into firmware interface.

4

Select Firmware Upgrade(USB)

5

Click and confirm upgrade.

**6**

Upgrading is in progress. After that, the monitor will restart in black screen automatically (Do not power off during this process).

**7**

After completing the upgrade, boot up the monitor and click Main Menu → Firmware → Virsion Information to confirm whether the software is successfully upgraded.
